Heavy coating protects against acids, bases, caustics.

For Chemical, Construction, Fishing, Mining, Oil and Gas Drilling, Painting and Refining Industries.

Packaging

- Sold by Dozens
- 6pr/bundle. See below for case pack.

Care

Wash in warm water, air dry. No bleach

TECHNICAL INFORMATION

PVC Coated

Supported Coated gloves have a cotton shell that is dipped into liquid PVC and cured. This coating is resistant to acids, most petroleum hydrocarbons, fats and oils.

PVC gloves are not recommended to be sufficient below freezing 32° F. PVC starts to decompose when the temperature reaches 140 °C (284 °F), with melting temperature starting around 160 °C (320 °F).
