

SUPPORTED NITRILE

Product Description

- Blue Nitrile Coated, Smooth Finish
- 100% Cotton Jersey Liner
- Heavyweight
- Fully Coated
- Safety Cuff
- Men's Size Large
- Import

Applications

See Chemical Resistance Chart for specific resistance.

Heavy coating protects against acids, bases, caustics.

For Chemical, Construction, Fishing, Mining, Oil and Gas Drilling, Painting and Refining Industries.

Packaging

- Sold by Dozens
- See below for case pack.

Care

Wash in warm water, air dry. No bleach

TECHNICAL INFORMATION

FULLY COATED

Fully Coated gloves gives your hands greater protection from chemicals.

Nitrile is a synthetic rubber that hold up to oil. The coating is more tear and abrasion resistant than natural latex that protects the hand from rough surfaces and sharp edges while providing flexibility.

Nitriles are found in many useful compounds, including methyl cyanoacrylate, used in super glue, and nitrile rubber, a nitrile-containing polymer used in latex-free laboratory and medical gloves.
